

Industry-Ready: Project 2

Project Title:

Live Dashboard using Power BI & Google Sheets

Project Objective:

- To design and implement a real-time data visualization dashboard using Power BI and Google Sheets that provides dynamic, interactive, and automated reporting for business insights.

Project Scope:

- Connect and integrate Google Sheets with Power BI as a live data source.
- Develop Power BI dashboards that update automatically based on changes in the Google Sheet.
- Enable interactive filtering, visualization, and drill-down options for end users.
- Customize visuals based on business KPIs and audience needs.
- Ensure secure and real-time access to live dashboards.

Tools and Technologies:

Power BI, Google Sheets, Power Query, DAX, Cloud Connectors, Scheduled Refresh, Microsoft Excel.

Team Members:

Project Lead: **CodeTechie**

Milestones and Deliverables:

1. Power BI Data Connection Setup.
2. Report Sharing and Dashboard Embedding
3. Documentation and User Manual

Expected Outcome:

- Interactive live dashboard capturing real time changes in Google sheets.
